

THE PRINTABLE SPORTSFILM IS IDEAL FOR PHOTO-REALISTIC IMAGES, OR TONES, TO CREATE MULTI-COLORED DESIGNS.

This is a polyurethane film for full color graphics with total opacity for heat transfer application, ideal for printing high quality, four-color graphics, and providing total opacity. It is perfect for print and cut because of its polyester carrier. The material is thin, white and extremely easy to weed, and is easy to cut through to the polyester backing. The material enables a reduction in production time when printing heat transfers suitable for garment application with your eco-solvent printer/cutter. Sportsfilm was developed so that it will dry very quickly thus saving unnecessary down time before heat application.

Colors remain vibrant after washing, the effect is soft with a matte finish. Coated with a specialty adhesive designed for application on a wide range of fabrics, including synthetics, performance wear and many designer textiles.

AVAILABLE IN

50 cm x 25 m Rolle

RECOMMENDED FABRICS

- 100% cotton
- 100% polyester*
- Polyester-cotton blends

* Test before application!

CUTTING NOTES

You should always test cut prior to any production run. Remember cutter settings will need to be adjusted as your blade ages. Cutting too deep will result in weeding or masking difficulties.

APPLICATION INSTRUCTIONS

- Temperature: 130° / 150°C
- Time: 10 sec. / 5 sec.
- Pressure: medium
- (#4-6 on Hotronix®)
- Peel: hot

ACCESSORIES RECOMMENDED

- CAD-COLOR® MagicMask Plus
- Grip Cover Sheet
- Coversheet - Non-Sticky
- EZ Weeder®
- Squeegee

CARE INSTRUCTIONS

Machine wash up to 60° C using mild detergent. Do not use bleach. Dry at normal dryer settings on household machines. Do not dry clean. Iron only inside out.

STORAGE

Store in cool, dry area. Avoid direct heat, sunlight and humidity.
