

EASY TO PRINT AND TO APPLY

HOW TO PRINT

Create your design and output to your laser printer or laser copier. Feed each sheet individually into the copier and use the setting for 'heavy paper'.

ATTENTION: The design always has to be right reeding! Cut motif to size & peel off paper backing before applying

APPLICATION INSTRUCTION

Re-press garment for 3-5 seconds, prior to application. Position the CLC Paper on your garment with the colour layer facing upwards. Please use for reapply a Grip-coversheet!

Name	for	Temperature	Time	Pressure	Remove carrier	Re-press	Recommended for	washable up to
Evolution Dark	CLC	180 – 200° C	40 – 60 sec.	high		cover with grip- coversheet	Cotton, poly-cotton	30° C

ATTENTION

This transfer paper shows a strong reaction to humidity. We therefore recommend to store it in a dry place at all times. The atmospheric moisture must never exceed 30 %. To achieve the best possible printing quality and wash resistance you need to set your machine up to maximum pressure. If the black colour is fading, the pressure wasn't high enough. Peel off the carrier, position the transfer on your garment and cover with Grip cover sheets as well as 5 sheets of normal paper. Afterwards you can heat apply as per the above instructions, let it cool off and carefully remove the Grip cover sheet.

To achieve a softer finish slightly stretch the textile.
