

WITH OUR TRANSFERS ...

... you can accept any order! Any design, any color, even complex color transitions are possible.

Endless possibilities without large investments or production areas. You can even earn money with our transfers from home. All you need is a heat press: Simply place the textile of your choice, position the transfer on it and print! The result: a high-quality, wash-resistant textile print in vibrant colors. With transfers, you can print on T-shirts, hoodies, pants, shoes, bags, bottle coolers and much more! Discover the diversity of STAHLS' transfers and start printing on a wide range of products today.

4C TRANSFER

UltraColor® PRO Transfer UltraColor® Transfer

For **higher quantities** of photorealistic motifs and designs with color gradients

Ideal for band merchandise,
 promotional items for trade fairs
 company events, graduation T-shirts, ...

SCREEN PRINTED

InkTra[®] Universaltransfer Plus

Screen printed transfers are made using plastisol on a special carrier or backing paper instead of a garment printed. When used properly, screen printed transfers will last the entire lifespan of garment.

DIRECT TO FILM

UltraColor® MAX Transfer

DTF transfer of the highest quality.
Designed for **small quantities**. For example: Hoodie printed with name and photo and all uniquely personalized items.

4C PRINTING - VIBRANT WATER-BASED COLORS

CAN BE PRINTED AT 125°C

HOT PEEL NO WAITING TIME

WATER-BASED TECHNOLOGY FOR PHOTOREALISTIC TEXTILE PRINTS

This digital screen print transfer is a hybrid full color transfer, the digitally printed design is combined with a screen print backing. UltraColor® PRO transfers offer a clean edge, full color printing and a soft touch.

UltraColor® PRO is especially worthwhile if you need high quantities of large designs. Choose UltraColor® PRO now to transfer virtually any design to almost any textile!

If needed, prints can also be made with a subli-blocker.*

CHARACTERISTICS

- Hot Peel
- ▶ Photo-realistic compatibility (60 grid)
- High opacity because it has a white back
- Washable up to 40° C
- UltraColor® PRO: cotton, non-sublimation dyed polyester, cotton/polyester blends
- ▶ UltraColor® PRO Sublistop: sublimation dyed polyester

HELPFUL TIP *FOR SUBLISTOP PRODUCTS

We always recommend prior pressure tests and therefore we would be happy to provide you with samples.

UPLOAD

NO MESS - JUST PRESS & PROFIT

In the transfer printing process, your motifs are printed onto a carrier using special inks. This transfer can be applied to any heat-resistant textile/fabric. The usual applications include Full front prints, chest prints, hooded sleeves, neck labels, caps, pocket prints and much more.

Transfer printing is an easy and affordable way to profitably finish garments without having to make a huge investment beforehand. All you need is a heat press.

Ready? Then get started now and upload your design to www.transfer.stahlseurope.de!

SAY YES!
